Shepherd's Garage Breaks Ground on New Dillon Facility

New location at 325 Cleverly Lane will expand service, parts and equipment capabilities

DILLON, Mont. - Shepherd's Garage has broken ground on a new facility at **325 Cleverly Lane in Dillon**, with completion targeted for **May 2027**. The project will expand the company's ability to serve farmers, ranchers, contractors and equipment owners throughout southwest Montana.

Rich Shepherd established the Dillon location in 2005, bringing the family business's commitment to equipment sales and service to the community. Today, Toby Shepherd and Evan Peacock are building on that foundation by expanding into a new location designed to serve the area for generations to come.

"Our customers depend on their equipment to make a living, and our job is to help keep them working," said Evan Peacock of Shepherd's Garage. "More shop space, a larger parts inventory and a better equipment yard will help us take better care of them. We're proud to make this investment in Dillon and the communities we serve."

The new facility will feature expanded shop bays, an improved showroom and space for a larger parts inventory. These improvements will give the Dillon team more room to service equipment and support customers' day-to-day needs.

"We're excited to bring the same commitment to customer service our customers have come to expect, with more capacity to meet their needs," said Toby Shepherd of Shepherd's Garage. "This new facility gives us room to grow while keeping our focus on the people and relationships that built Shepherd's Garage."

Plans also include a larger, organized equipment yard with dedicated areas for new, used and rental equipment. Additional parking and improved loading and unloading areas will make equipment pickups, deliveries and customer visits easier.

About Shepherd's Garage

Shepherd's Garage is a fourth-generation, family-owned Montana business providing equipment sales, parts, service and rentals. With roots in Jackson and locations across western Montana, the company serves customers in agriculture, construction and property maintenance.
